

## Doosan Forklift Part

Doosan Forklift Part - Doosan Infracore Company Ltd. is an intercontinental establishment consisting of Diesel Engines, Defense Industry goods, Industrial Vehicles, Construction Technologies and Machine Tools and Mechanization Systems.

Their United States affiliate, Doosan Infracore America Corporation, operating in Suwanee, Georgia houses a 170,000 square foot production facility, home to a Compact Equipment and Construction division. Cleveland, Irvine houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool department. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer needs.

There are well over 220 Doosan service and sales locations operating in Canada and the United States. Furthermore, there are more than 90 independent sellers moving forklift materials and materials handling equipment. This system permits Doosan Infracore America to aggressively compete in this competitive marketplace. The lift truck product line remarkably features 63 distinctive machines consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these various truck versions range from 3,000 to 33,000 lbs. All trucks are manufactured in an ISO 9001 certified facility.

Doosan Infracore America is the fastest emerging forklift and lift truck corporation in the North American market, due to its excellent level of product performance and their persistently high level of consumer support and service given to all Doosan Infracore Lift Truck clients. The U.S. lift Truck division situated in Cleveland has a professional team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial domestic forklift marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled forklifts as part of a national machinery expansion venture. Early product sales of this manufacturing equipment focused on large business communities, the armed services and on state-run corporations. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division began trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical education became the new focus for enhancing quality and product development.

Daewoo started the first home-based lift truck business in 1967, and quickly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's advanced technological enhancements combined with sales success placed them in a position of significant growth of their lift truck business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the very competitive North American materials handling market. This joint-venture proved highly lucrative for Daewoo and their lift truck product sales expanded greatly. In 1984, the company completed construction of a new facility to help in manufacturing high end value-added products for export. In 1993, the company had a global sales network and started exporting designs they had established through in-house technology, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into international marketplaces.
